Message from the Director

Debbie Ridgely
OSDBU Director

Hot time, summer in the city! Thus far, the month of June has been the hottest on record for Washington, DC and HHS has multiple opportunities available as we get ready to move into the fourth and final quarter of FY 2010. I am pleased to highlight the successful launch of the HHS Mentor-Protégé Program which is accepting applications from interested parties through July 2, 2010.

The mentor **MUST** have a contract with HHS with an approved subcontracting plan. The OSDBU office does not match mentors with potential protégés, as that is a "B2B" endeavor. Mentor Protégé details are available on our Home Page located at: www.hhs.gov/osdbu

This quarter we feature National Capitol Contracting (NCC), a successful 8(a) firm who won its first contract with HHS in 2005 and has increased its revenue by 1000% within HHS, as well as, expanding their business line with other Executive Agencies. A Presidential Memorandum was signed on April 26, 2010 by President Obama, asking Executive Agencies to increase opportunities for small businesses across our country. The Memorandum defines five (5) different Task Force areas and I am pleased to share that HHS has been asked to serve on one of the Task Force groups. Recommendations will be sent forward to the President for consideration and implementation in short order.

In closing, HHS will be attending and participating in the Sixth Annual National Veterans Conference in July. While our awards to Veteran-Owned and Service-Disabled Veteran-Owned companies continue to increase; we still need more. Please consider attending the conference. (For further details, visit our [Home Page](#)).

HHS Contract Propels NCC to Financial Success

National Capitol Contracting (NCC) negotiated its first federal contract with HHS in 2005. According to Chris Marquez, President, "This \$3.5 IDIQ million contract propelled NCC's growth. Our revenues grew from 2005 to 2009 beyond 1000% and we project revenue growth of another 30% in 2010."

Equipped with a good track record from its first HHS contract, the firm has obtained contracts with other HHS Operating Divisions and offices. These include the Center for Medicare and Medicaid Services (CMS), Office of External Affairs, NIH's Small Business Office, Office of Research Services and the National Institute on Drug Abuse (NIDA).

Recently, NCC used its expanded capabilities to help the Substance Abuse and Mental Health Services (SAMHSA) overcome a major logistical test. The agency had only five days notice to deliver a live four-hour webcast to 300 different individuals. The building where this event was to take place did not have sufficient bandwidth to deliver a live webcast using standard technology. The firm solved the challenge within the five days allotted, by introducing a streamlined software and hardware solution to accommodate the live webcast.

Since then, NCC has won multiple contracts with other federal and government agencies. These include: the DoD Office of the Secretary of Defense, Joint Forces Headquarters Command, U.S. Army Contracting Center of Excellence and U.S. Army; Information Technology. The firm has also worked for U.S. Fish and Wildlife Service, U.S. Department of Housing and Urban Development, U.S. Environmental Protection Agency, U.S. Library of Congress and U.S. Marshals Service.

Chris Marquez, NCC President, stated that "HHS gave us the opportunity to expand our capabilities and expertise. We now provide comprehensive communication services to our clients. We credit our exponential growth in part, to winning and successfully executing our first HHS contract." NCC is an SBA 8(a) firm. Visit <http://www.nccsite.com>.

SBA Gives Women-Owned Small Businesses New Opportunities

On March 4, 2010, The Small Business Administration (SBA) filed a Proposed Rule in the U.S. Federal Register regarding the Women-Owned Small Business Federal Contract Program. This Proposed Rule would help ensure a level playing field in which Women-Owned Small Businesses (WOSBs) can compete for Federal contracting opportunities. Final determination of the Proposed Rule is expected by First Quarter FY 2011.

"Women-Owned Small Businesses are one of the fastest growing segments of our economy, yet they continue to be underrepresented when it comes to federal contracting," said SBA Administrator Karen Mills.

Background:

The Federal government has a five percent contracting goal for all Federal contracts for Women-Owned Small Businesses. SBA began tracking these numbers in 1999. Since then, the goal was reached only once in 2002. Government-wide contracting with Women-Owned Small Businesses hovers around three percent annually. The HHS OSDBU works hard so that the Agency consistently meets and in some years exceeds the five percent goal.

SBA has identified eligible industries where WOSBs are "underrepresented" or "substantially underrepresented" using both "numbers"

and "dollars" measures of underrepresentation. It also used the Fiscal Year 2006 Central Contractor Registration (CCR) database as the data source for determining eligible industries under the WOSB Program.

The Proposed Rule allows a contracting officer to select from two or more WOSBs, after determining that there is a reasonable expectation that they will submit offers for the contract. Another stipulation is that the price of the contract award is fair and reasonable.

The proposed program allows contracting officers to restrict competition to WOSBs in 83 industry categories, based on the North American Industry Classification System (NAICS) code. The NAICS is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

Have a question?

Please visit our FAQ page for answers:
<http://www.hhs.gov/osdbu/faqs/>

For industries classified as "underrepresented," the business must show that it is "economically disadvantaged". For those industries classified as "substantially underrepresented", all Women-Owned Small Businesses can participate.

Currently 45 industries are considered to be "underrepresented" and 38 industries are listed as "substantially underrepresented."

Some of the “Underrepresented” Industry NAICS Codes are:

- 2213:** Water, Sewage, and other systems
- 2361:** Residential Building Construction
- 2371:** Utility System Construction
- 2381:** Foundation, Structure, and Building Exterior
- 2382:** Building Equipment Contractors
- 2383:** Building Finishing Contractors
- 2389:** Other Specialty Trade Contractors
- 3149:** Other Textile Product Mills
- 3159:** Apparel Accessories and Other Apparel Manufacturing
- 3129:** Other Wood Product Manufacturing
- 3222:** Architectural and Structural Metals Manufacturing
- 3321:** Forging and Stamping
- 3323:** Architectural and Structural Metals Manufacturing
- 3324:** Boiler, Tank, and Shipping Container Manufacturing
- 3333:** Commercial and Service Industry Machinery Manufacturing

3342: Communications Equipment Manufacturing

3345: Navigational, Measuring, Electrometrical, and Control Instruments Manufacturing

3346: Manufacturing, and Reproducing Magnetic and Optical Media

3353: Electrical Equipment Manufacturing

3359: Other Electrical Equipment and Component Manufacturing

3369: Other Transportation Equipment Manufacturing

4842: Specialized Freight Trucking

4881: Support Activities for Air Transportation

4884: Support Activities for Road Transportation

4885: Freight Transportation Arrangement

5121: Motion Picture and Video Industries

5311: Lessors of Real Estate

The 38 “Substantially Underrepresented” Industry NAICS Codes are:

- 2372:** Land Subdivision
- 3152:** Cut and Sew Apparel Manufacturing
- 3231:** Printing and Related Support Activities
- 3259:** Other Chemical Product and Preparation Manufacturing
- 3328:** Coating, Engraving, Heat Treating, and Allied Activities

NIH	The National Heart, Lung, and Blood Institute (NHLBI) is planning to support a Science Moving towards Research Translation and Therapy (SMARTT) program for the production and testing of novel therapeutics to treat heart, lung, and blood diseases. This program will fund one Pharmacology & Toxicology Center (PTC). The PTC will be established to conduct pharmacology and toxicology analyses for potential biologic, non-biologic, and small molecule therapeutics. The PTC will evaluate and prioritize requests for service based on their ability to fulfill the request. The biologic, non-biologic, and small molecule products are primarily intended for clinical use within the United States. Products may be released by the PF for clinical use only under an IND.	4) \$5,000,001 to \$10,000,000	Scott Bredow	bredowsa@nhlbi.nih.gov (301)-435-0333	4th Qtr FY2010	Full & Open	Research & Development	541712

* Estimated Solicitation Release
